

Flexible Lidstock Packaging

2008 to 2012

Table of Contents

Section I:

Introduction

- A. Key definitions
 - 1. Lidstock
 - 2. Lid
 - 3. Innerseal
- B. Study organization
- C. Geographic regions
- D. Methodology
- E. Conventions

Section II:

Executive Summary

- A. Technology
 - 1. Structures and materials
 - 2. Lidstock application technology
 - 3. Competitive solutions
- B. Market trends and drivers
 - 1. Market overview
 - 2. Trends and drivers
- C. Market projections
 - 1. End-use
 - 2. Container type
 - 3. Lidstock structures
 - 4. Printed versus unprinted
 - 5. Heat-seal layer type
 - 6. Barrier versus non-barrier
 - 7. Peelable versus weld seal
 - 8. Microwaveable versus non-microwaveable
 - 9. Finished product type
 - 10. Lidstock purchases

Section III:

Technology

- A. Structures and materials
 - 1. Structural layers
 - 2. Seal layers
 - 3. Coextruded lidstock
 - 4. Seal strength concepts
 - 5. Product types
 - 6. Value-added features
 - 7. Lidstock waste
 - 8. Lidstock suppliers
- B. Lidstock application equipment technology
 - 1. Web placement using conduction sealing
 - 2. Pick and place using conduction sealing
 - 3. Closure lining using induction sealing
 - 4. Lidstock application equipment suppliers
- C. Key technologies
 - 1. High temperature processing and flexible lidstock
 - 2. Modified atmosphere packaging
- D. Competitive lidstock materials
 - 1. Pull-ring
 - 2. Shrink bands
 - 3. Shrink labels
 - 4. Neckbands
 - 5. Overwrapping
 - 6. Tamper-evident caps
 - 7. Paperboard sleeve
 - 8. Metal lug cap
 - 9. Tear tape
 - 10. Plastic/paperboard combination lids

Section IV:

Market Trends and Drivers

- A. Product overview
- B. Trends and drivers
 - 1. Consumer lifestyles
 - 2. Ease of use
 - 3. Product variety
 - 4. Demographics
 - 5. MAP technology
 - 6. Product and packaging integrity
 - 7. Glass vs. plastic
 - 8. Thermoformed trays
 - 9. Environmental impact

Section V:

Market Projections

- A. End-use projections
- B. End-use projections – retail food
 - 1. Dairy
 - 2. Snack food
 - 3. Beverage
 - 4. Prepared drinks
 - 5. Fresh pasta
 - 6. Confectionery
 - 7. Condiments
 - 8. Refrigerated meat
 - 9. Seafood
 - 10. Soup and sauce
 - 11. Frozen food
 - 12. Shelf-stable entrees
 - 13. Shelf-stable fruits and vegetables
 - 14. Breakfast food
 - 15. Baby food and formula
 - 16. Other food
 - 17. Lidstock summary for total retail food
- C. End-use projections – retail non-food markets
 - 1. Retail – healthcare
 - 2. Retail – pet food
 - 3. Retail – personal care
 - 4. Retail – agri-chem
 - 5. Retail – other
 - 6. Summary – non-food retail
- D. End-use projections – non-retail food
 - 1. Non-retail food – dairy
 - 2. Non-retail food – condiments, sauces, dressings
 - 3. Non-retail food – other
 - 4. Summary – non-retail food
- E. End-use projections – non-retail non-food
 - 1. Healthcare
 - 2. Agri-chem
 - 3. Other
 - 4. Summary – non-retail non-food
- F. End-use summary – all applications
- G. Lidstock segmented by container type
 - 1. Rigid Trays
 - 2. Flexible Trays

3. Blister Packs
4. Cups and bowls
5. Bottles
6. Composite and Metal Cans
7. Projection
- H. Lidstock segmented by structure
 1. All polymer structures
 2. Aluminum foil-containing structures
 3. Paper-only structures
 4. Non-woven structures
 5. Metallized film-containing structures
 6. Projections
- I. Lidstock segmented by printed versus unprinted
 1. Printed versus unprinted lidstock
 2. Projection
- J. Lidstock segmented by heat-seal layer type
 1. Fluid coating
 2. Extrusion coating
 3. Films
 4. Projection
- K. Lidstock segmented by barrier versus non-barrier
 1. Barrier versus non-barrier lidstock
 2. Projection
- L. Lidstock segmented by seal type
 1. Peel or weld seal
 2. Projection
- M. Lidstock segmented by microwaveability
 1. Microwaveable versus non-microwavable lidstock packages
 2. Projection
- N. Lidstock segmented by finished form
 1. Roll lidstock
 2. Daisy chain
 3. Diecut Lids
 4. Projection
- O. Lidstock purchases
 1. Retail food
 2. Retail non-food
 3. Non-retail foods (foodservice)
 4. Non-retail non-foods

Section VI:
Producer Profiles

**Section VII:
Equipment Profiles**

**Section VIII:
Glossary**
