

Medical Device Packaging 2009 to 2013

Section I:

Introduction

- A. Study purpose
- B. Medical devices defined
- C. Medical device packaging defined
- D. Study organization
- E. Geographic regions
- F. Study methodology
- G. Conventions

Section II:

Executive Summary

- A. Regulations and standards
 - 1. Regulation sources
 - 2. Globalization
- B. Technology
 - 1. Sterilization
 - Figure 1 – Sterilization Processes
 - 2. Materials
 - 3. Structures
 - 4. Packaging automation
 - 5. Package formats
- C. Medical device market
 - 1. Drivers and trends
 - Table 1 – 2008 Global Population
 - Table 2 – 2008 Per Capita GDP and Healthcare Spending
 - Table 3 – 2008 Global Healthcare and Device Spending
 - Table 4 – Global Healthcare Spending
 - 2. Market projections
 - Figure 2 – Packaged Units of Medical Devices
 - Figure 3 – Medical Device Growth Rates
- D. Medical device packaging
 - 1. Drivers and trends
 - 2. Total market segmentation
 - Figure 4 – Packaging Volume – All Categories of Packaging
 - Figure 5 – Packaging Value – All Categories of Packaging

3. Categories of packaging
 - Figure 6 – Packaging Volume Segmented by Category
 - Figure 7 – Packaging Value Segmented by Category
4. Primary packaging consumption segmented by end-use
 - Figure 8 – Primary Packaging Consumption Segmented by End-use
5. Primary packaging buyers segmentation
 - Table 5 – Global Packaging Purchases – All Categories
6. Primary packaging segmented by package type
 - Figure 9 – Primary Packaging Consumption by Package Type
 - Figure 10 – Primary Packaging Value Segmented by Package Type
 - Figure 11 – Packaging Growth Rates by Packaging Format
7. Geographic region segmentation
 - Figure 12 – Packaging Consumption by Geographic Region
 - Figure 13 – Packaging Growth Rates by Geographic Region

Section III:

Regulations and Standards

- A. Regulations and standards
 1. Global device and packaging regulations
 2. Testing standards
 3. Additional concepts
- B. ISO 11607 key concepts
 1. Responsibilities
 2. Scope of medical device
 3. Packaging system
 4. Health care facilities
- C. ISO 11607 review
 1. General requirements
 2. Materials
 3. Forming and sealing process
 4. Final package
- D. Packaging development process
 - Figure: 14 – Medical Device Package Development Process
 - 1. Material selection
 - 2. Package design
 - 3. Design the manufacturing process
 - 4. Conclusion
- E. Submissions and approval times
 1. Approval options
 2. Classes of medical devices
 - Figure 15 – Medical Device Classification by FDA in United States
 3. Device approval process

- F. Marketing considerations
 - 1. Packaging producers
 - 2. Equipment suppliers
 - 3. ISO quality systems
 - 4. Clean room production
 - 5. Material and process changes
- G. Labeling
- H. Combination healthcare products

**Section IV:
Technology**

- A. Technology trends and drivers
 - 1. Regulations
 - 2. Labelling
 - 3. In-package sterilization
 - 4. Sterility procedures
 - Figure 16 – Sterile Presentation of Suture
 - 5. Packaging cost
 - 6. Product and package integrity
 - 7. Easy-open feature
 - 8. Transparency
 - 9. Packaging process automation
 - 10. Environmental factors
 - 11. User perceptions
- B. Sterilization technology
 - Figure 17 – Trends of Sterilization Methods
 - 1. Heat sterilization
 - 2. Ethylene oxide (EtO) gas sterilization
 - 3. Radiation sterilization
 - 4. Emerging sterilization processes
 - 5. Sterility assurance limits
 - 6. Summary
- C. Packaging materials
 - 1. Non-wovens for medical device packaging
 - Table 6 – Comparison of *Tyvek* Non-Woven Grades
 - Table 7 – Medical Grade Non-woven Suppliers
 - 2. Papers for medical device packaging
 - Table 8 – Medical Grade Paper Producers
 - 3. High-barrier materials
 - 4. Film and sheet
- D. Packaging structures

1. Coated papers and non-wovens
2. High-barrier materials
3. Film and sheet
4. Other materials
 - Figure 18 – Vent System
- E. Package types
 - Figure 19 – Header Bag
 - Table 9 – Package and Film Producers
- F. Medical device packaging equipment
 1. Automated packaging equipment
 2. Pouch and bag machines
 3. Tray formers
 4. Thermoform/fill/seal
 - Table 10 – Thermoform/fill/seal Equipment Suppliers
 - Figure 20 – Thermoform/Fill/Seal Process
 - Figure 21 – Chain Drive System
 - Figure 22 – Gripper Design
 5. Tray sealers
 - Table 11 – Tray Sealing Equipment Suppliers
 - Figure 23 – Tray Sealer
 6. Sealers
 - Figure 24 – Band Sealer
 - Table 12 – Pouch Sealing Equipment Suppliers
 7. Horizontal wrappers
 8. In-line printing
 9. In-line sterilization
 10. Packaging materials for high speed packaging
 11. Continuous monitoring
 12. Packaging equipment suppliers¹²⁶
 - Table 13 – Packaging Speeds in Select Markets
- G. Environmental considerations
 1. Waste reduction
 2. Recycling
 3. Homogeneous packaging
- H. Cost reduction trends
 1. Reduced thickness
 2. Use of non-woven vents on lids
 3. Peelable films – use of uncoated non-wovens
 4. Peelable films – use of uncoated paper
 5. Rigid trays to semi-rigid trays
 6. New resin formulations for forming web materials
- I. Catheter segment

Figure 25 – Foley Catheter and Catheter Packaging

Figure 26 –

Stent and Guidewire

J. Drapes

1. Drapes

Figure 27 – Drapes and Drape Packaging

2. Sterilization wraps

Figure 28 – Sterilization Wrap

K. Electro-mechanical devices

1. High-value electro-mechanical devices

2. Commodity electro-mechanical devices

Figure 29 – Electrosurgical Pencil

L. Gloves

Figure 30 – Glove and Glove Packaging

M. Injection Systems

Figure 31 – Injection Systems and Injection Systems Packaging

N. Non-invasive devices

Figure 32 – Non-invasive Device and Non-invasive Device Packaging

O. Orthopedic devices

Figure 33 – Orthopedic Dental Implant Packaging

P. Other (includes kits)

Figure 34 – Other Packaging Including Kits

Q. Sutures

Figure 35 – Sutures and Suture Packaging

R. Tubing

Figure 36 – Tubing and Tubing Packaging

S. Wound care

Figure 37 – Wound Care and Wound Care Packaging

T. Summary

Table 14 – Popular Packaging Formats in Use Today by Application

Section V:

Market Trends/Projections

A. Global healthcare industry

Table 15 – Global Healthcare Spending

1. GDP and healthcare spending

Table 16 – 2008 Per Capita GDP and Healthcare Spending

2. Global disparity of healthcare spending

Table 17 – CAGR of Per Capita GDP by Geographic Region

3. GDP vs. healthcare spending growth

- Table 18 – 2003 to 2008 GDP and Healthcare Spending Growth
 - 4. Global demographics and healthcare spending
 - Table 19 – Per Capita Healthcare Spending by Age
 - Table 20 – 2008 Global Population
 - 5. Public vs. private healthcare spending
 - Table 21 – 2008 Global Healthcare Spending Sources
 - 6. Summary
- B. Market drivers and trends
 - 1. Healthcare spending
 - Table 22 – 2008 Global Healthcare and Device Spending
 - 2. Demographics
 - 3. Universal healthcare spending
 - 4. Price controls and regulations
 - 5. Device inflation
 - Table 23 – Catheter/Stent Costs
 - 6. Private healthcare spending
 - 7. Standards and regulations
 - 8. Globalization of the healthcare industry
 - 9. Medical tourism
 - 10. Disposable versus reusable devices
 - 11. Technology and device innovation
 - 12. Home healthcare
 - 13. Contract manufacturing
 - 14. Mergers and acquisitions
- C. Packaging drivers and trends
 - 1. Medical device demand
 - 2. Types of users
 - 3. Custom kits
 - 4. Reusable vs. disposable devices
 - 5. Sterilization method
 - 6. Mounting cards
 - 7. Custom devices
 - 8. Packaging cost compared to cost of the device
 - 9. Clean room package production
 - 10. Contract packaging and sterilization
 - 11. Packaging automation
 - 12. Globalization and ISO standardization
 - 13. Rigid versus flexible
 - 14. Downgauging
 - 15. Non-woven versus paper
 - 16. Coated versus uncoated
 - 17. Standard versus reinforced paper

- 18. Demand for transparent packaging
- 19. Security
- 20. Printing and labeling
- 21. Home healthcare
- 22. Mergers and acquisitions
- 23. Environmental
- D. Primary packaging volume segmented by end-use
 - Table 24 – Device Category
 - 1. Catheters
 - Table 25 – Catheters Packaging
 - 2. Drapes
 - Table 26 – Drapes Packaging
 - 3. Electro-mechanical devices
 - Table 27 – Electro-mechanical Device Packaging
 - 4. Gloves
 - Table 28 – Sterilized Gloves Packaging
 - 5. Injection systems
 - Table 29 – Injection Systems Packaging
 - 6. Non-invasive devices
 - Table 30 – Non-invasive Devices Packaging
 - 7. Orthopedic devices
 - Table 31 – Orthopedic Devices Packaging
 - 8. Sutures
 - Table 32 – Sutures Packaging
 - 9. Tubing
 - Table 33 – Tubing Packaging
 - 10. Wound care
 - Table 34 – Wound Care Packaging
 - 11. Other (including kits)
 - Table 35 – Other and Kits Packaging
 - 12. In-hospital
 - Table 36 – In-hospital Packaging
 - 13. Summary
 - Table 37 – Total End-use Packaging
 - Table 38 – Primary Packaging Volume by End-use
- E. Primary packaging value segmented by end-use
 - 1. Primary packaging value segmented by end-use
 - Table 39 – Primary Packaging Value by End-use
- F. Primary packaging purchases
 - 1. Catheters
 - Table 40 – Global Packaging Purchases – Catheters
 - 2. Drapes

- Table 41 – Global Packaging Purchases – Drapes
- 3. Electro-mechanical devices
 - Table 42 – Global Packaging Purchases – Electro-mechanical
- 4. Gloves
 - Table 43 – Global Packaging Purchases – Gloves
- 5. Injections systems
 - Table 44 – Global Packaging Purchases – Injection Systems
- 6. Non-invasive devices
 - Table 45 – Global Packaging Purchases – Non-invasive Devices
- 7. Orthopedic devices
 - Table 46 – Global Packaging Purchases – Orthopedic Devices
- 8. Sutures
 - Table 47 – Global Packaging Purchases – Sutures
- 9. Tubing
 - Table 48 – Global Packaging Purchases – Tubing
- 10. Wound care
 - Table 49 – Global Packaging Purchases – Wound Care
- 11. Other and kits
 - Table 50 – Global Packaging Purchases – Other and Kits
- 12. In-hospital
- 13. Summary
 - Table 51 – Global Packaging Purchases – All Categories
- G. Primary packaging volume segmented by package type
 - 1. Market
 - Figure 38 – Primary Packaging Volume Segmented by Package Type
 - 2. Projection
 - Table 52 – Packaging Consumption by Package Type
- H. Primary packaging value segmented by package type
 - 1. Market
 - Figure 39 – Primary Packaging Value Segmented by Package Type
 - 2. Projection
 - Table 53 – Primary Packaging Value Segmented by Package Type
- I. Primary packaging volume segmented by material type
 - 1. Market
 - Figure 40 – Primary Packaging Volume Segmented by Materials
 - 2. Projection
 - Table 54 – Primary Packaging Volume Segmented by Material
- J. Primary packaging value segmented by material type
 - 1. Market
 - Figure 41 – Medical Device Packaging by Packaging Materials
 - 2. Projection
 - Table 55 – Primary Packaging Markets Segmented by Material Type

- K. Primary packaging volume segmented by geographic region
 - 1. Market
 - Figure 42 – Primary Packaging Volume by Geographic Region
 - 2. Projection
 - Table 56 – Primary Packaging Volume by Geographic Region
- L. Primary packaging volume segmented by sterilization method
 - 1. Market
 - Figure 43 – Primary Packaging Volume by Sterilization Process
 - 2. Projection
 - Table 57 – Packaging Consumption by Sterilization Method
- M. Primary packaging volume segmented by level of automation
 - 1. Market
 - Figure 44 – Primary Packaging Volume by Process Automation
 - 2. Projection
 - Table 58 – Primary Packaging Volume by Process Automation
- N. Insert, secondary, and tertiary packaging – volume and value
 - 1. Insert packaging
 - Table 59 – Insert Packaging Volume by Package Type
 - Table 60 – Insert Packaging Value by Package Type
 - 2. Secondary packaging
 - Table 61 – Secondary Packaging Volume by Package Type
 - Table 62 – Secondary Packaging Value by Package Type
 - 3. Tertiary Packaging
 - Table 63 – Tertiary Packaging Volume by Package Type
 - Table 64 – Tertiary Packaging Value by Package Type

Section VI:

Packaging Producer Profiles

Section VII:

Paper/Nonwoven Supplier Profiles

Section VIII:

Equipment Supplier Profiles

Section IX:

Glossary
