

Table of Contents

Section I:

Introduction

- A. Study purpose
- B. Pharmaceuticals defined
- C. Pharmaceutical packaging defined
- D. Study organization and methodology
 - 1. Methodology
 - 2. Organization
- E. Geographic regions
- F. Study deliverables
 - 1. Packaging manufacturers and converters
 - 2. Resin, additive, and component suppliers
 - 3. Equipment manufacturers
 - 4. Pharmaceutical producers, contract manufacturers and packagers

Section II:

Executive Summary

- A. Drivers and trends
 - 1. The human condition
 - 2. New drug requirements
 - 3. Over-the-counter (OTC) market
 - 4. Drug delivery methods
 - 5. Child resistance
 - 6. Anti-counterfeiting
 - 7. Tamper evidence
 - 8. Patient compliance
- B. Market projections
 - 1. Global market
 - 2. Geographic segmentation
 - 3. OTC versus prescription
 - 4. Child resistant
 - 5. Anti-counterfeit
 - 6. Patient compliance
 - 7. Tamper evidence
 - 8. Package type

- C. Emerging technology
 - 1. Package
 - 2. Filling
 - 3.
- D. Summary

Section III:

Technology

- A. Technology drivers and trends
 - 1. Drug safety and efficacy
 - 2. Drug sensitivity
 - 3. Drug delivery method
 - 4. Regulations – drug safety and efficacy
 - 5. Packaging cost
 - 6. Environment and health
 - 7. Packaging requirements
- B. Primary packaging
 - 1. Ampules
 - 2. Blister packs
 - 3. Bottles
 - 4. Canisters
 - 5. Cartridges
 - 6. Intravenous (IV) bags
 - 7. Mini-jars
 - 8. Pouches
 - 9. Pre-filled inhalers
 - 10. Pre-filled syringes
 - 11. Tubes
 - 12. Vials
 - 13. Other primary containers
 - 14. Innerseals
 - 15. Closures
- C. Secondary packaging
 - 1. Folding carton
 - 2. Sleeves
 - 3. Wallets
 - 4. Shrink bands and wraps
 - 5. Labels
 - 6. Other
- D. Compliance packaging
- E. Child-resistant packaging
 - 1. Multi-dose packaging – recloseable

- 2. Unit-dose packaging – non-recloseable
- 3. Additional child resistant technologies
- F. Tamper-evident packaging
- G. Unit-dose packaging
- H. Unit-of-use packaging
- I. Anti-counterfeit packaging
 - 1. Overt solutions
 - 2. Covert solutions
- J. Labelling
- K. Identification and tracking
 - 1. Bar codes
 - 2. Radio frequency identification (RFID)
- L. Active packaging
- M. Packaging processes for sterile drugs
 - 1. Traditional aseptic packaging.
 - 2. Aseptic packaging with barrier isolation technology
 - 3. Terminal sterilization (in-package)
- N. Packaging processes for non-sterile drugs
- O. Pharmaceutical packaging materials
 - 1. Polymers
 - 2. Glass
 - 3. Aluminum foil
 - 4. Paper
 - 5. Paperboard
 - 6. Other
- P. Packaging structures
 - 1. Blister pack structures
 - 2. Bottles, vials, ampules, cartridges, and mini-jars
 - 3. Pouch structures
 - 4. Pre-filled syringes
 - 5. IV bags
 - 6. Tube structures
 - 7. Secondary packaging
 - 8. Other structures
- Q. Pharmaceutical packaging equipment technology
 - 1. Filling equipment

Section IV:

Market Trends and Projections

- A. Healthcare industry
- B. Pharmaceutical industry drivers and trends

1. Government policies
 2. Aging population
 3. Markets in developing nations
 4. New drugs and technology
 5. Biologics
 6. Generic drugs
- C. Pharmaceutical packaging drivers and trends
1. Underlying product demand
 2. Regulatory environment
 3. Government programs
 4. Product differentiation
 5. Drug Safety
 6. Conversions from prescription to OTC
 7. Patient compliance
 8. Unit-dose
 9. Alternative drug delivery methods
 10. Consumer habits/preferences
 11. Automation
 12. Environmental
 13. Drug protection requirements
- D. Pharmaceutical packaging segmented by delivery method
1. Oral delivery
 2. Inhaled
 3. Parenteral
 4. Transdermal
 5. Cutaneous
 6. Ocular
 7. Nasal
 8. Other
 9. Forecast by drug deliver method
- E. Primary packaging segmented by package format
1. Blister packs
 2. Bottle
 3. Tubes
 4. Vials
 5. Mini-jars
 6. Ampules
 7. Pre-filled syringes
 8. Pouches
 9. IV Bags
 10. Other
 11. Closures
 12. Innerseals

- 13. Projection
- F. Secondary packaging segmented by package type
- G. Pharmaceutical packaging segmented by packaging material
 - 1. Polymer
 - 2. Glass
 - 3. Aluminum foil
 - 4. Paper
 - 5. Paperboard
 - 6. Other
 - 7. Projection
- H. Pharmaceutical packaging segmented by geographic region
 - 1. Europe
 - 2. North America
 - 3. Japan
 - 4. Rest of World (ROW)
 - 5. Projection
- I. Pharmaceutical packaging segmented by regulatory status
 - 1. Prescription
 - 2. OTC drugs
 - 3. Projection
- J. Packaging segmented by drug production process
 - 1. Chemical
 - 2. Biological
 - 3. Projection
- K. Pharmaceutical packaging segmented by distribution channel
 - 1. Retail
 - 2. Institutional
 - 3. Projection
- L. Pharmaceutical packaging segmented by compliance
 - 1. Electronic compliance
 - 2. Non-electronic compliance
 - 3. Projection
- M. Pharmaceutical packaging segmented by anti-counterfeiting
 - 1. Anti-counterfeit
 - 2. Projection
- N. Pharmaceutical packaging segmented by child resistance
 - 1. Child resistance
 - 2. Projection
- O. Pharmaceutical packaging segmented by tamper evidence
 - 1. Tamper evidence
 - 2. Projection

**Section V:
Packaging Producers**

**Section VI:
Equipment Suppliers**

**Section VII:
Glossary**
